TENTS

the widest range
of inflatable
event tents

HIGH QUALITY TPU SEALED TUBES

All AXION tents are use 250mic seamless TPU bladder tubes ended by using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

SMART INFLATION SYSTEM

Patented one way central inflation system provides the luxury of one point inflation with perfect control of inflation from chamber to chamber. It also provides easy detection of eventual air leak. Smart inflation system is now included in most of AXION models.

FULLY SERVICEABLE BY USER

It is a life. Usually you get some damage at the moment, when you need your tent up. If there is ever damage done to your tent, a repair kit is available for all AXION models. Thanks to the zip-off roof and the central tube connector, any user can change the inflatable tube onsite within a few minutes without having to send the tent out for service!

EXTREME SAFETY

In comparison to metal structure tents there are no dangerous rigid components. In comparison to the old fashioned inflatable tents with permanent blower, sealed inflatable tents or also so called pneumatic tents are independent of power grid. AXION is one of the safest pneumatic tents on the market. Tested for up to 100 km/h and certified for 60 km/h, it can withstand the most extreme of weather conditions. The structure is very flexible and will keep those in the tent safe during strong winds. AXION is designed to bend and twist with the wind and back to its original shape.

MODULARITY

All sizes of each AXION model can be connected together by tunnels, so a tent village can be created. More over, some sizes of different AXION models can be interconnected by tunnels too.

REVERSIBLE WALLS

All walls are reversible. You can also get double walls with an opaque layer inside, panorama walls, section walls and more.

EASY TRANSPORT

Packed in an original trolley bag, each AXION tent can be easily transported in any personal car. This is a great advantage of inflatable tents in comparison to metal tents.

EASY

basic model of promotional inflatable tent

CONCEPT

AXION Easy is a high quality inflatable tent with simplified structure, respecting financial limits of our clients. Even with limited budget it provides them an opportunity to use a quality brand inflatable tent, made in the EU, without compromises.

An EASY model is an easy concept of four independent inflatable legs nicely forming a roof with a place for four artworks to be printed by sublimation printing without color limits. Similar to other AXION models, there is a possibility to use different branded roofs with one structure, easily changeable by the zip-off technology for better promotion. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full color dye sublimation upon demand.

LITE

high quality
inflatable
promotional tent
for every budget

CONCEPT

The aim with creation of AXION LITE was to provide an easy, budget friendly, but high quality inflatable promotional tent to the market. The LITE model is a simple concept of four sealed inflatable legs forming a roof with a place for four artworks to be printed using sublimation printing without color limits. Brand managers appreciate the option of using different branded roofs with one structure, easily changeable using the zip-off technology for better promotion. The zipoff cover, walls, visors and the entire inflatable structure can be printed in full color dye sublimation upon demand.

HANDLING and SET UP

The AXION LITE is made of strong, yet lightweight polyester fabric. Using patented AXION Smart Inflation System (that controls the airflow using the central valves system), requires one person to set up within minutes. The entire dome packs down into the original trolley bag that fits into any standard sized car, making it perfect for any roadshow or event.

SQUARE

sealed inflatable
event tent
using horizontal
inflatable beams

CONCEPT

As the first member of the AXION family (created in 2010) the AXION SQUARE carries signature features of the AXION brand, like the horizontal stabilization inflatable beams, the central tube connector, the zip-off roof, and its availability in 4 sizes, which makes it one of the most reliable inflatable event tents on the market.

Brand managers love the option of being able to use different branded roofs with one structure, easily changeable by the zip-off technology. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full color dye sublimation on demand.

WEATHER RESISTANCE

AXION SQUARE is proven to withstand winds up to 100 km/h, ranking the AXION product as one of the safest inflatable tents on the market.

TRIPOD

open space
inflatable
shade for car
promotion

CONCEPT - AXION TRIPOD is a great concept for both indoor and outdoor events as an inflatable podium cover, promotional tent or as a stylish sun shade. A zip-off roof and side walls can be sublimation printed. Enjoy it's innovative shape and airy design.

COVER AREA - The canopy of TRIPOD shade is made of water resistant fabric, so there is no need to add the water proof layer in case of rain. Thanks to the negative sloped side walls, the efficient usage area is much larger. There is no need to use additional visors, as the internal space is unaffected by rain or sun. More over, it is possible to connect more TRIPODS by tunnels to create an extraordinary tent village.

HANDLING - As with our other AXION pneumatic tents, handling is very easy. The TRIPOD is packed into a trolley bag and is easily transportable in any personal car. Just one person can transport and inflate it within minutes by one valve using patented AXION Smart Inflation System.

SERVICE - Thanks to the zip-off roof and the central tube connector, any user can change the inner bladder or whole inflatable arch onsite within a few minutes without having to send the tent out for service!

HEXA

wide space
hexagonal
inflatable tent

CONCEPT

The primary idea was to offer wider space inside to all those who do not wish to connect two tents together with a connection tunnel. AXION HEXA meets this task perfectly, without creation of funnel in the middle of the internal space. Similar to the SQUARE model, HEXA is equipped with horizontal beams to provide better side stability.

COVER AREA, HANDLING and SET UP

According to the diagram, HEXA covers up to 56m2. Even at this size, two people can easily inflate it within minutes. The entire dome packs down into the original trolley bag that fits into any standard sized car, making it perfect for any roadshow or event.

CUBE

pure form
inflatable event
tent

CONCEPT

CUBE is a solution for all those fed up with traditional inflatable or pop up tents. Thanks to a unique solution (hidden water drain), the roof can stay optically flat and works perfectly outdoor in any rain conditions. As with all AXION products, there is no need for permanent power supply!

DESIGN

CUBE is a unique inflatable tent designed in a modern cubist style. Different from any other inflatable tent, it offers straight vertical panels - perfect for your branding.

HANDLING and SET UP

The AXION CUBE is made of strong yet lightweight polyester fabric. An installation requires just one person to set up within minutes. The entire dome packs down into the original trolley bag that fits into any standard sized car, making it perfect for any roadshow or event.

SPIDER

increase your
event space with
a spider dome

CONCEPT - Based on the traditional Spider inflatable dome concept, AXION SPIDER is a combination of a big hexagonal shape dome and the unique AXION system of sealed structures. SPIDER provides a big space and high wind resistance, thanks to more inflatable structure elements. Additionally, it is the only Spider tent on the market available with inflatable visors. All of this without the necessity for permanent power supply!

COVER AREA - SPIDER is ideal for large events looking for a contemporary and unique design. It offers a floor space of 42m2 up to 80 m2. Available in a range of sizes and options including zip-off reversible walls, optional visors and branding that would meet your event requirements. A variant of SPIDER 10 with 3 visors (occupying a space of 74 m2) provides a contemporary solution which conforms to the legal requirements in most countries (no necessity for local building permissions). The SPIDER is engineered to amaze with the added ease of setting up.

HANDLING and SET UP - SPIDER is made of strong yet lightweight polyester fabric with contoured legs. Using our AXION Smart Inflation System (that controls the airflow using the central valves system), requires no more than 2 people to set up and will take less than 20 minutes to assemble. The entire dome packs down into a compact carry bag that fits into any standard sized car, making it perfect for any roadshow or event.

FLOWER

sybiosis of the
design and a
technology

DESIGN - The AXION FLOWER is a unique inflatable structure inspired by nature, to bring a fresh new emotion to the traditional event stand industry. The symmetric shape allows fresh air inside with added weather protection from optional triangle shaped inserts. Each petal is an individual part of the structure with individual branding opportunity that can help you make a breath-taking visual impact.

HANDLING - Each size variant of the FLOWER is transportable in a van. Depending on its size, a team of 3 to 6 people can completely build it within 3 to 5 hours, depending on terrain and personal experience.

TECHNOLOGY - The FLOWER is a combination of three materials. The shape of the petals is guaranteed by a patented system of high pressure pneumatic tubes, inflated to nominal pressure 2,0 bar (10x more than standard pneumatic structures).

WEATHER RESISTANCE - The FLOWER is certified according to Eurocode norm for wind up to 100 km/h. In case of thunderstorm or strong wind, the central pole can be retracted to decrease total height of the whole structure by 1,3m. Water floating to the center is drained through central gutter. Optional triangle shades are protecting the inside area against water, as well as giving more shade, increasing efficient size of of the dome by 15%.

SHAPE

sealed inflatable
event objects

HIGH QUALITY TPU SEALED TUBES

All AXION tents use 250mic seamless TPU bladder tubes finished using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

INTERNAL ILLUMINATION

Take the opportunity to use an internal illumination to the AXION products. Both 230V plug or 12V unplug systems are available in white or RGB version. Thanks to using modern flat LED sources connected to compact click-in Li-Ion batteries, an illumination of the AXION products is easy to be used and effective for any night event.

SMART INFLATION SYSTEM

Standard inflatable arches are fully dependent on the power source. In a case of power outage an unpleasant or even dangerous situation can occur. Sealed AXION Arches are independent of power and more weather stable as they are inflated to higher pressure. For double safety each arch can be equipped with an automatic pressure control system.

FULLY SERVICEABLE BY USER

That's life! The moment you need your structure up and running, odds are some damage will occur. If there is ever damage done to your Shape object, a repair kit is available for all AXION models. Thanks to the easy zip-in system, any user can repair or change the inflatable tube on-site within a few minutes without having to send the object out for service!

COLORS WITHOUT LIMITS

For AXION Shape objects we use the newest technologies in dye sublimation printing, automatic cutting and welding, so each object can have different full color design.

EXTREME STABILITY

A ballast plate, a ballast bag or even a combination can be used as an accessory to any of the AXION Shape products.

EASY TRANSPORT

The base of each AXION Shape object works as a transport bag. Just deflate the object and zip-on the top part.

ARCH ARE

sealed
pneumatic arch
angled shape

AXION Inflatable Arches are slimmer than traditional arches due to their higher internal pressure. It has better weather resistance, better stability, no collapse risk and no

Angled Inflatable Arch is the most common arch shape for sport events, offering big space for branding. AXION Pneumatic Arch is our variant of the angled shape, already well tested at hundreds of events in many countries around the world.

weight (kg)	9,0	13,0	16,0

POP-UP

display wall -
slim and rigid
inflatable display

The AXION Wall brings the advantage of pop-up display in combination with sealed inflatable technology, suitable for indoor and outdoor use. Using drop-stitch fabric technology with high pressure inside, after proper anchoring it is able to withstand the same wind as heavy duty solid display with an added advantage - this display is inflatable! For indoor use, there are laser cut feet available, making the whole wall self standing without noise of a fan. As an option there's the possibility of installing LED lights to the top edge of the wall.

The wall is available in 3 size variants with fully dye sublimation printed “sock” or banners.

It is possible to save money by using different “socks” per one wall. This product is perfectly suitable for all kinds of advertising or sport events, as an inflatable billboard, sponsor wall or photoshooting wall.

FURNITURE

inflatable event furniture

HIGH QUALITY TPU SEALED TUBES

All AXION products use 250mic seamless TPU bladder tubes ended using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

INTERNAL ILLUMINATION

Take the opportunity to use the internal illumination in the Bistro or Bongo inflatable table. Both 230V plug or 12V unplug systems are available in white or RGB version. Thanks to the modern flat LED sources connected to compact click-in Li-Ion batteries, illumination of AXION products is easy to achieve and effective for any night event.

STABILITY

A ballast plate, a ballast bag or even the combination can be used as an accessory to Bistro or Bongo table. The result is extreme stability. Ballasting of inflatable objects at your events will no longer be an issue.

INFLATABLE EVENT FURNITURE

AXION Furniture is a great accessory to complete your inflatable event set. Our set of inflatable furniture contains donut seating, puff seating, tables and desks in different shapes and combinations. It is light and easy to transport, but very stable after inflation. The whole installation of your lounge or catering furniture set takes just minutes.

COLORS WITHOUT LIMITS

We use the newest technologies for dye sublimation printing, automatic cutting and welding, so each object can have different full color design in a photo quality.

EASY TRANSPORT

Transport of event furniture used to be a nightmare, but it is different with AXION inflatable furniture.

ACRYLIC GLASS TOP COVER

Acrylic glass top cover - very nice and useful cover especially for showrooms. We don't recommend it for frequent events, because there is risk of scratching or breaking.

TABLE

bistro & bongo
simple and
reliable inflatable
table for each
event

BISTRO TABLE

BONGO TABLE

The hour-glass shaped inflatable tables are great to use as solitaire, or to be combined with the Omega inflatable seat. When folded, it is only a disc of 80cm diameter and 12cm height and the weight of the bag is 14kg. In minutes you will get a perfect promotion or catering table. The whole inflatable body is air sealed and no permanent fan is needed after inflation. When the table is well pressurized, it is more stable than any other table on the market. Optional steel ballast plate is available for outdoor events, while internal LED illumination creates a special atmosphere while highlighting your logo printed on the body. AXION Table is a simple and reliable product for any event.

There are two models available – model BISTRO is 110cm high (good for standing catering), model BONGO is 72cm high (good for use in a combination with Omega seat).

	BISTRO	BONGO
Diameter “Ø” (cm)	80	80
Height “Y” (cm)	110	72
Thickness when packed in a bag (cm)	14	12
Weight (w/o shelves) (kg)	13	11
Dye sublimation print all over	possible	
Fully serviceable by user	yes	

DESK

inflatable desk
straight or
bended shaped

BENDED DESK

STRAIGHT DESK

AXION Desk is an excellent product for POP / POS campaigns. It comes with an easily transportable bag that is 120x46x12cm in size and weighs only 13kg. One person can inflate the two tubes within 5 minutes resulting in a great desk with a solid top and bottom. Inflatable tubes are air sealed and a permanent fan is not needed after inflation. You have the flexibility to place two shelves in between the inflatable tubes, or add a white or RGB light to illuminate it from the inside. The entire surface area of the desk can be printed in full color dye sublimation upon demand..

There are two models available – BENDED desk or STRAIGHT desk.
Just choose one that fits your needs

	STRAIGHT DESK	BENDED DESK
Width "X" (cm)	120	120
Depth "Z"(cm)	40	46
Height "Y" (cm)	105	105
Thickness when packed in a bag (cm)	14	14
Weight (w/o side walls, w. acc.) (kg)	17	18
Dye sublimation print all over		possible
Fully serviceable by user		yes

SEAT

inflatable seat
for individual or
groups

A standard set of solid table and chairs will not easily fit into a standard sized vehicle. If you are organizing a fair or small event and need even more seating, the AXION Seat can solve this problem easily.

You can choose from different kinds – YOU seat and OMEGA seat or PUFF. YOU or OMEGA are “donut” type seats designed for more seating to be paired with tables. OMEGA fits to the special round fiberglass stackable table or the BONGO table and offers comfortable seating for up to 4 people. YOU seat is designed to fit to the aluminium foldable pop-up table, offering seating for up to 5 people. PUFF is a comfortable individual seat for 1 person, offering a patented combination of air and polystyrol for cushioning in a soft version, or the budget solid version. All types of seats can be printed in full color dye sublimation upon demand.

	OMEGA SEAT	YOU SEAT	BONGO PUFF	BISTRO PUFF
Width "X"(cm)	-	185 - 245	-	-
Depth "Z" (cm)	-	180 - 210	-	-
Diameter "Ø" (cm)	190	-	45	45
Height "Y" (cm)	45	45	50	70
Size of bag (cm)	40 x dia. 20	40 - 50 x dia. 20	15 x dia. 45	15 x dia. 45
Weight (w/o table) (kg)	5	5 - 7	3	4
Dye sublimation print all over		possible		
Fully serviceable by user		yes		

CHILLOUT

design inflatable furniture for comfort at your event

AXION | CHILLOUT is a set of inflatable furniture, containing a single chair, a double chair and a table. Our goal was to make an inflatable furniture, which is really comfortable, so people may relax there for hours. On the other hand we wished to meet budget limits of clients, not willing to spend too much for inflatable furniture. And of course we focused to bring a new design to the market. The result of our development is a great combination of all above.

AXION Chillout is a perfect event solution. Those who would wish to put a branding on it, may combine dye sublimation printed „sock“ on the back support tube, seat mattresses or both. The sock is attached with zippers, so the different one may be used for each event. A table may be equipped with an acrylic glass board, UV printed on the bottom side.

Material used for AXION Chillout is a strong PVC film 0,5mm with „leather look“ embossed surface and reinforced bottom part. Material of chillout furniture is UV stable and easy to be cleaned.

	SINGLE CHAIR	DOUBLE CHAIR	TABLE
Width "X"(cm)	130	180	87
Depth "Z" (cm)	120	120	87
Height "Y" (cm)	72	72	32
